PARAMESH NATHI

SRE | DEVOPS | AWS & AZURE | KUBERNETES | CI/CD | CLOUD AUTOMATION | INCIDENT MANAGEMENT

Dynamic IT professional with extensive expertise in Production Support, DevOps Engineering, Site Reliability Engineering, and Platform Engineering, focused on enhancing operational efficiency, system reliability, cloud infrastructure, and automation. Open to Platform Engineer opportunities leveraging expertise across AWS, Azure, GKE, Kubernetes, CI/CD, Infrastructure as Code, observability, and cloud automation.

EDUCATION

B.Tech | Electrical, Electronics & Communications Engineering
Rajiv Gandhi University of Knowledge Technologies, Basar | 2016

CORE COMPETENCIES

- Incident Management Strategies
- Cloud Resource Optimization
- Performance Monitoring Techniques
- Automation Best Practices
- System Reliability Engineering
- Cross-Functional Team Collaboration
- Agile Development Methodologies
- Infrastructure as Code (IaC)
- Disaster Recovery Planning
- Continuous Improvement Processes

PROFILE SUMMARY

- **SRE & DevOps professional with over 8 years of experience** driving production reliability, cloud operations, deployment automation, and service excellence across large-scale enterprise environments, including healthcare, retail, and eCommerce platforms.
- Proven expertise in **engineering resilient and highly available systems**, combining SRE practices, observability, incident management, performance engineering, and proactive problem resolution to strengthen platform stability and business continuity.
- **Automation-focused technology professional** who transforms manual and repetitive operations into scalable engineering workflows using Python, Bash, Ansible, CI/CD, and GitOps, accelerating releases while improving operational consistency.
- **Rookie of the Year:** Recognized for outstanding **incident resolution and problem-solving** capabilities on the OYI application.
- **Customer Champion & Impact Driver:** Awarded for **alert optimization, operational improvements, and cost savings**.
- **Quarter of the Year Award at Zelis Healthcare (Oct 2025):** Recognized for exceptional contribution to **production reliability, incident management, and operational excellence**.

WORK EXPERIENCE

Zelis Healthcare Pvt. Ltd. – Hyderabad
Associate SRE Team Lead | Nov 2024 – Present

- Leading production deployments, hotfix releases, and change management for S365 applications supporting 40+ enterprise clients, leveraging Dradis automation to maintain high availability and zero critical SLA breaches.
- Monitoring and managing healthcare and eCommerce platforms including S365, Smart Shopper, PRS, PCS, FG&I, Propel, and Medxoom using Datadog APM, Infrastructure Monitoring, Log Management, and RUM.
- Driving incident management, RCA, troubleshooting, and MTTR reduction, while coordinating major incident response through PagerDuty with engineering and infrastructure teams.
- Managing indexing, replication, reference synchronization, and search cluster health, while resolving index failures, replication issues, stale footers, and version validation alerts through proactive automation.

TECHNICAL SKILLS

AI & Generative AI: ChatGPT, GitHub Copilot, Microsoft Copilot, Google Gemini, Claude AI, Amazon Q, Prompt Engineering, Lovable, n8n
Version Control: Git, GitHub, GitLab
Monitoring & Observability: Datadog, Grafana, Prometheus, Splunk
CI/CD & DevOps: Jenkins, GitHub Actions, GitLab CI
Cloud Platforms: AWS, Microsoft Azure, Google Cloud Engine
Containerization & Orchestration: Docker, Kubernetes
Scripting & Automation: Python, Bash/Shell Scripting
Configuration Management: Ansible Programming: Java
Development & API Tools: IntelliJ IDEA, Eclipse, Visual Studio, Azure Data Studio, Android Studio, Postman
Infrastructure as Code (IaC): Terraform
Project Management & Agile Delivery: Agile, Scrum, Sprint Planning, Daily Standups, Backlog Refinement, Sprint Reviews, Retrospectives

CERTIFICATIONS

- AI Tools Mastery Program | B10X
- Generative AI for Beginners | Zelis Healthcare
- AWS Technical Essentials & AWS Cloud Practitioner Essentials | Amazon Web Services (AWS)
- Azure DevOps Certification | Walmart Global Tech
- CI/CD Certification | Maven, Jenkins, Git & GitHub | Walmart Global Tech
- Containers & Orchestration Certification | Containers, Kubernetes & OpenShift | Walmart Global Tech
- Scrum master certification | Walmart Global Tech

- Conducting K6-based Load & Performance testing, leading blameless postmortems, and implementing preventive actions to strengthen platform reliability, scalability, observability, and operational maturity.
- Driving CI/CD and deployment automation across production environments, coordinating pipeline execution, release activities, configuration changes, and rollback readiness to ensure reliable deployments.
- Managing Git-based DevOps workflows, including branch management, configuration changes, release coordination, and automated feature enablement to support controlled production releases.
- Led end-to-end delivery of Data, Analytics, and AI Platform initiatives, managing scope, timelines, milestones, dependencies, risks, and cross-functional execution.
- Maintained project plans, roadmaps, RAID logs, resource plans, and executive status reports to ensure alignment with business priorities and delivery commitments.
- Applied Scrum and Agile practices to deliver work iteratively through epics, features, user stories, acceptance criteria, and sprint-based execution.
- Partnered with Product Owners to maintain healthy backlogs, prioritize work, manage capacity, and align sprint goals with product roadmaps.

Highlights:

- Led a 9-member SRE team across 60+ major incidents; automated RCA/postmortems using Python, Azure OpenAI, Microsoft Graph, and Azure Functions, reducing documentation effort by 95%.
- Engineered an AI-driven Azure FinOps platform using FastAPI, PostgreSQL, Cost Management APIs, and LLM analytics, reducing cloud spend by 30% and review effort by 33%.
- Built an Agentic AI Kubernetes copilot using Sim.ai, RAG, MCP, and Agent Skills, improving troubleshooting speed and operational consistency by 20%.
- Developed an AI-powered Terraform drift detector using Go, Terraform, AWS APIs, and GPT-4o, reducing infrastructure drift investigation time by 55%.
- Successfully enabled and managed Datadog APM instrumentation and feature flags through Git-based configuration repositories, enhancing observability, distributed tracing, and performance monitoring across a microservices architecture.
- Orchestrated feature enablement activities, including Tagger Core, AI Search, and application-level feature flags through GitOps workflows, ensuring controlled rollout strategies and production readiness.
- Executed Git operations encompassing cherry-picking, branch management, merge conflict resolution, and release coordination to support agile development and facilitate rapid production deployments.
- Recognized for implementing a robust monitoring and alerting system that improved incident response times by 35%, underscoring a proactive approach to system management.
- Achieved a remarkable reduction in deployment times by 48% through the successful implementation of CI/CD pipelines, showcasing operational excellence.

Walmart Global Tech Pvt. Ltd. – Chennai
Technology Services Engineer III | June 2022 – Nov 2024

- Implemented Jenkins and GitLab CI pipelines, reducing deployment time by 51% and deployment errors by 30%.
- Automated AWS, GKE and Azure resource provisioning using Ansible, reducing infrastructure setup time by 40%.
- Engineered scalable, highly available environments using Docker and Kubernetes, improving deployment flexibility and resilience.
- Developed Python and Bash automation scripts, improving operational efficiency by 25% and reducing manual intervention.

- Enhanced observability and incident response using Prometheus and Grafana, reducing response times by 35%, while standardizing Git practices and reusable Ansible playbooks.
- Facilitated Sprint Planning, Daily Standups, Backlog Refinement, Sprint Reviews, and Retrospectives for Agile delivery teams.
- Removed delivery impediments and coached teams on Agile/Scrum best practices to improve sprint predictability, collaboration, and continuous improvement.

Walmart Global Tech Pvt. Ltd. – Chennai
Technology Services Engineer II | June 2020 – June 2022

- Deployed Grafana and Prometheus for infrastructure monitoring and leveraged Splunk for log analysis, reducing downtime by 20%.
- Managed ITIL-based incident workflows through ServiceNow and JIRA for the OYI inventory management system supporting Sam's Club operations.
- Diagnosed and resolved application, network, and system issues through RCA and preventive remediation, improving platform stability.
- Administered Git, GitHub repositories using effective branching and merging strategies to streamline development workflows.
- Configured and maintained Apache and Tomcat servers, improving application performance, availability, and operational reliability.

Verinon Technology Solutions Pvt. Ltd. – Hyderabad
Software Engineer | March 2018 – May 2020

- Implemented ITIL-based incident management using ServiceNow and JIRA, streamlining issue tracking and service delivery.
- Diagnosed and resolved application, network, and system issues through RCA and preventive actions, strengthening system reliability.
- Designed and developed KPI dashboards using Power BI and Grafana, improving operational visibility and performance tracking.
- Optimized monitoring and alerting workflows by refining thresholds and leveraging xMatters for critical notifications and faster response.
- Created application flow diagrams, RCA documents, and support playbooks, strengthening knowledge management and troubleshooting efficiency.
